Digitalize your employee evaluation process

Altamira Performance is a cloud-based software that allows you to evaluate employee competencies and goals in an agile, transparent, and collaborative environment.

Recreate your evaluation processes

Take full advantage of the four pre-made evaluation templates available on the platform and adapt them to your company's specific needs.

As a matter of fact, most of the platform is fully customizable, including evaluation metrics and timelines, skills, objectives, etc. You could decide, for example, to allow self-evaluation or to carry out one or more interim reviews.

Increase transparency and reward merit

Altamira Performance provides a self-service portal where managers and collaborators can interact in total transparency.

Employees can view their own appraisal process while managers provide feedback on their team. An automatic notification system informs the parties when it's their time to engage.

The screenshot displays the 'Valutazione comportamenti osservabili 2020' interface. It features a sidebar with navigation icons, a top navigation bar with tabs for Summary, Properties, and Evaluations (8), and a search bar. The main content area shows a table of evaluations with columns for Status, Photo, Surname and name, Role, Photo, Manager, and Manager role. The table lists 8 evaluations, each with a checkbox and a link to the evaluation details.

Map out your company's human capital

Map out the soft and hard skills available in your company. Our software assigns skills to specific roles, while other competencies are deemed essential for anyone working at the company; these parameters are fully customizable to adapt to your needs and processes.

Evaluate competencies with observable behaviors

During the evaluation process, acquired skills can be evaluated directly or through observable behaviors. The latter option allows for a greater level of objectivity, assessing the actual frequency of a concrete behavior rather than an abstract competence.

The screenshot displays the Altamira Performance software interface. The top navigation bar includes the Altamira logo, a menu icon, the user name 'Kaya Jerome - 2019', and a 'Return to project pmps' link. The left sidebar contains a navigation menu with options: HOMEPAGE, RECRUITING, EMPLOYEES, ATTENDANCE, LEARNING, PMP, Evaluation projects, Setup, OTHER, REPORT, and MARKETPLACE. The main content area shows the 'Evaluations (8)' tab selected. It displays a profile for Kaya Jerome, an Employee role, with a manager Chang Kenzo, a Senior Account. The 'Evaluation result' tab is active, showing a graphical representation of the evaluation result with four categories: DEBOLE (red), DA RAFFORZARE (orange), ADEGUATA (blue with a red 'SELF' button), and FORTE (blue with a red 'CAPO' button). Below this, there are sections for 'NOTES FROM SELF' and 'NOTES FROM MANAGER'. The 'NOTES FROM SELF' section contains the text: 'Ho raggiunto i target impostati a inizio anno e aggiornati durante la review di metà anno.' The 'NOTES FROM MANAGER' section contains the text: 'Siamo soddisfattissimi del lavoro svolto.' At the bottom, there is a table titled 'AGGREGATE EVALUATIONS' with columns for Skill, Self, and Manager. The table lists two skills: 'Client orientation' and 'Effective communication', both with 'ADEGUATA' ratings for both Self and Manager. At the bottom of the interface, there are buttons for 'Save', 'New', 'Actions', and 'Reopen manager appraisal'.

Skill	Self	Manager
Client orientation	ADEGUATA	ADEGUATA
Effective communication	ADEGUATA	ADEGUATA

Identify skills that need strengthening

By inputting the actual and desired level for a targeted skill, the platform will automatically identify the existing gaps, thus informing the implementation strategy of the company's employee development programs.

Define your goals

With our performance evaluation platform, employees and managers can work together to define qualitative and quantitative goals, which can be set on a personal, team, or corporate level.

As a result, employees know how to contribute to the company's success, while managers are provided with reliable metrics that help them assign promotions and rewards.

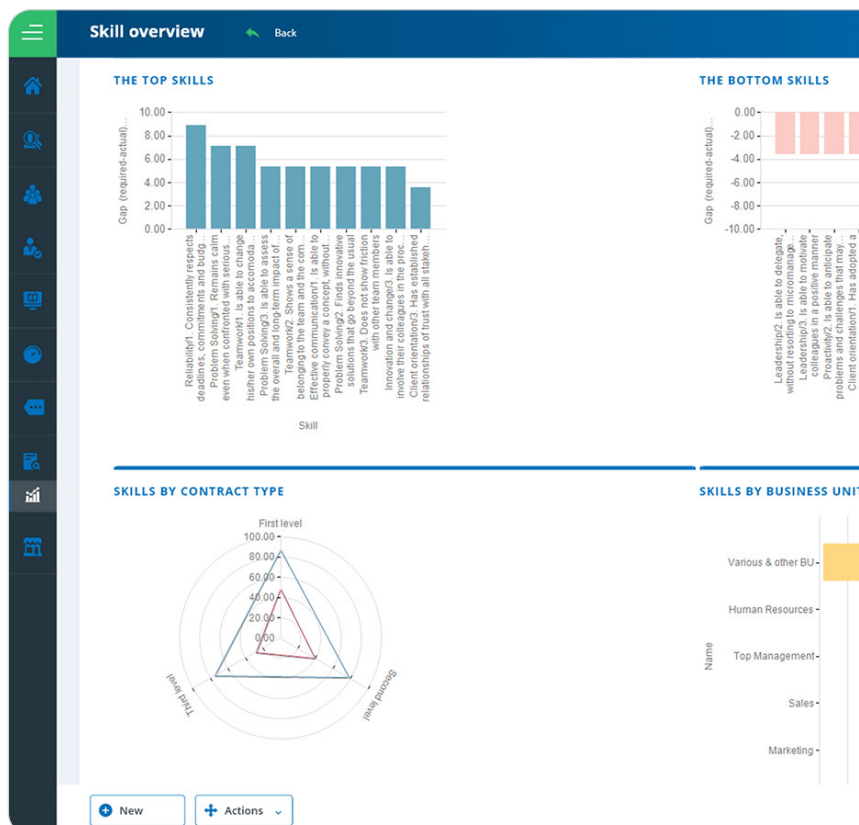

Build MBO models

The definition and evaluation of objectives can be part of a more or less complex MBO model that leads to the award of bonuses and prizes and to the outlining of development actions. In addition, the reward amount can be calculated automatically by the platform.

Analyze the results

Altamira's rich library of reports gives you an overview of your employees' skills and their ability to achieve your designated goals.

New performance reports can be built autonomously or together with our support team.
